The rest of the record shown in Form No. 2 illustrates that the service to this shovel was poor, as in an hour s time 10 minutes were lost in waiting for wagons. If time had not been lost for other reasons from 7 to?:45 there would have been lost time due to waiting for wagons. This shovel for the work it was doing should have been served with four more wagons. Attention should be called to the two records given of moving the shovel. The first one was done rapidly, namely in 3i/ minutes, while the second one consumed 7 minutes. This was due to the chain breaking in moving the first section of the platform. This meant that time was consumed in changing the chains from one section of the platform to another, which could have been prevented by having an extra chain with the shovel. With two chains the shovel was moved rapidly, with one chain much slower. The platform parting was another mishap due to the lack of an extra chain. The records here shown give the result of loading 81 wagons in an hour and 43 minutes, or an average of 47 in an hour. With a load of 9/10 of a cubic yard this means about 425 cubic yard excavated in a 10-hour day. This can be called a good day s work for a shovel of this kind, yet the record shows that during the 103 minutes,...
