

## Natural Resources and Environment: Wyoming Wastewater Treatment Facility Proves Unsuccessful: Ced-81-94

By -

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Pursuant to a congressional request, GAO investigated the circumstances surrounding the failure of the wastewater treatment facility in Thayne, Wyoming. The \$1.15 million facility is now being used by 106 sewage hookups in Thayne while the Star Valley Cheese Corporation (SVCC), for which the facility was principally designed, discharges its wastes directly into the local waterway. Throughout its history, the facility has been beset by problems. The spray irrigation system selected for the project was high-risk because it tended to ice up in the harsh winters and needed a high level of operation and maintenance. SVCC continually overloaded the facility's capacity to treat wastes. The project design was deficient in that both the storage pond and the land on which the treated wastewater was sprayed were too small. The construction company did a poor job: liners of the storage pond were improperly installed and the land receiving the sprayed water was improperly prepared. Operation and maintenance activities were neglected, and most of the new construction items provided for in a grant amendment were never installed. The system...
